**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 23 March 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Information Disclosure Statement***

The listing of references in the specification, particularly JP 08527643 A, is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

### ***Specification***

The abstract of the disclosure is objected to because it exceeds the 150 word limit. Correction is required. See MPEP § 608.01(b).

### ***Drawings***

It is noted that formal drawings were not received with the filing of this application on March 23, 2005 therefore the Examiner has taken the assumption that the drawings of the foreign application are to be the formal drawings and the informalities below are pertaining to those drawings. If this is an incorrect assumption Applicant is advised to file formal drawings.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: round opening 4b and bending plane B. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted

after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In lines 15 and 18 of claim 1 Applicant states the limitations "contains means for supporting the profile..." this limitation invokes 112 6<sup>th</sup> paragraph however, when referring back to the specification there is no structure that meets this limitation. Furthermore, by stating "contains means" one of ordinary skill in the art would interpret this to mean that there is another structural element within the guide element and the bending sleeve. It appears that Applicant is trying to claim the function of the guide element and the bending sleeve, therefore it is advised by the Examiner that Applicant remove the terms "contains means" from lines 15 and 18.

***Pertinent Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent # 4,412,442 to Kawanami et al discloses a method for bending a metal pipe wherein the pipe is heated with a heater prior to being bent by a bending arm. US Patent #

5,111,675 to Murata, US Patent # 6,253,591 to Sayama et al and JP Patent # 04,284,923 A to Ogasawara et al all show the state of the art.

### *Conclusion*
